

My Star Report

Video for April 28 Plutonic window

The power of the moon in the 8th house with Scorpio present is incredible. The 8th house is the house of transformation, renewal, life/death and rebirth. Epiphany, revolution, revelation, reconstruction, reposition, the transpersonal experience as it applies to all 4 basic categories of the human body – the human experience. Those 4 bodies being the spiritual, emotional, physical, and the mental or psychological.

A perfect example is the caterpillar that builds a cocoon, transforms itself in pupa, then chrysalis, and emerges as a butterfly or moth.

The 8th house is where we take all we've learned so far by experience in the personal houses and the personal planets and transform, truly transcend into the extra-personal areas of the zodiac. We are then ready to experience the higher self, higher awareness, higher education, higher harmonics, higher resonances and divine concepts of the 9th house through the 12th house. In fact, this is the point where we evolve into 9th house awareness and 9th house energies just as Acrisius transforms from a human stuck in Hades (Hell) for his sins, into a more nearly perfect being in the movie Clash of the Titans which is based on Greek Mythology. Acrisius is the human that Lord Hades (Pluto) uses to try to assassinate the hero demi-god Perseus. Hades gives Acrisius some of his own godly power and sends him out as an Agent of Hades, an Agent of Pluto, to kill and wreak havoc and lure Perseus into a trap that would surely be his end. In the end Acrisius is healed and enlightened through death at the hands of the hero Perseus and transforms into a more nearly perfect human. Life, death, drama, rebirth, renewal, transformation. These are the energies of Scorpio and Pluto and the 8th house. By the way, if you've seen Clash of the Titans, the giant Scorpions add a rather cool effect because Hades (or Pluto) of course rules Scorpio. Cool, huh?

This opportunity for growth is further given to even greater opportunity when Sagittarius moves into the 8th house in May 1st. Sagittarius rules the 9th house, rules, higher wisdom, higher knowledge, the higher self. It rules all we have learned collectively and is ruled by Jupiter which puts a hidden Jupiter in the 8th house for the coming month. Opportunity.

Remember, we are all the signs of the zodiac. No matter what your sun sign is – aries, Taurus, Gemini, cancer, you are all the signs of the zodiac. And while each of us have different energies, different constellations in our personal houses, different planetary influences ruling our behavioral tendencies within the context or experience in the 8th house, the precessional mundane conditions that are constantly changing in the background underneath it all, affect us all in very similar ways.

This is also a good time for deep, personal purification and detoxification. So seek out methods of purging residual toxins from the body. Foot baths, salt baths, electrical grounding to release excess negative energies that could be blocking meridian pathways in the physical and energetic body. Accupuncture, detox teas and just simply walking barefoot in the grass or on dirt. Connect the body to the Earth to literally ground out excess electrical energy.

I hope you all got a little something out of this video. Lusk – out.
